PROFESSIONAL SUMMARY

Senior Software Engineer and Full Stack Developer with 6+ years of experience designing, modernizing, and supporting enterprise applications. Strong expertise in Java, Spring Boot, REST APIs, microservices, Oracle, PostgreSQL, React, Angular, Node.js, AWS, and Docker. Delivered solutions across financial services, retail, logistics, government, and U.S. healthcare while combining hands-on engineering with solution design, technical planning, architecture collaboration, delivery coordination, and production support.

CORE EXPERTISE

Solution Design | Technical Leadership and Coordination | Legacy Modernization | Microservices Architecture | Enterprise Integrations | REST APIs | Cloud Delivery | Production Support | Technical Documentation | Cross-functional Collaboration with Product, Architecture, and QA

TECHNICAL SKILLS

Languages: Java 8/17/21, JavaScript, TypeScript, SQL, PL/SQL
Backend: Spring Boot, REST APIs, Microservices, Node.js, Maven, JPA/JDBC
Frontend: React, Angular, HTML5, CSS3, Bootstrap, PrimeNG
Data and Messaging: Oracle, PostgreSQL, MySQL, SQL Server, RabbitMQ, Kafka
Cloud and DevOps: AWS, Google Cloud Platform, Docker, Kubernetes (working knowledge), Git, Linux, CI/CD
Quality: JUnit, unit and integration testing, QA collaboration, incident analysis, technical documentation

PROFESSIONAL EXPERIENCE

Grupo Salinas | Specialized Java Developer

Sep 2024 - Present | Mexico City, Mexico | On-site

Selected projects: SPPI Enterprise Modernization / AWS Migration; InfoBionic U.S. Healthcare Platform

- Modernize enterprise services from Java 8 to Java 21, refactoring legacy components and strengthening maintainability, security alignment, and long-term support.
- Design and implement REST APIs with Spring Boot, Maven, Oracle, and PL/SQL to integrate enterprise platforms and business-critical data flows.
- Contribute to solution design, architecture discussions, technical planning, documentation, diagrams, unit and integration testing, certification, and deployment activities.
- Coordinate development activities with Product Managers, architects, QA engineers, and business stakeholders; support technical decisions and delivery planning.
- Build features for a U.S. healthcare platform using React, Node.js, PostgreSQL, REST APIs, and AWS.

Atos | Full Stack Developer

Nov 2021 - Oct 2024 | Mexico | Remote

Client engagement: The Home Depot, United States | Jun 2022 - Oct 2024

Projects: DFC Alerts, R2R Monitoring Platform, Delivery Application, and Production Support

- Modernized DFC Alerts across front-end and back-end components with Java, Spring Boot, Angular, and Oracle, improving notification efficiency by 40%.
- Developed R2R monitoring workflows for Miami and Houston environments using Java, Spring Boot, PostgreSQL, and RabbitMQ.
- Contributed to a delivery platform using React, JavaScript, Docker, and Google Cloud Platform for logistics and operational processes.
- Monitored production environments, investigated defects at source-code level, resolved complex incidents, and supported releases.
- Completed an enterprise engineering program and built an Amazon-inspired e-commerce platform with Java, Spring Boot, React, Oracle, and REST APIs.

PROFESSIONAL EXPERIENCE - CONTINUED

BBVA | Database and Systems Administrator

Jun 2021 - Oct 2021 | Mexico City, Mexico | Remote

- Supported mortgage-division applications and databases, including production incident follow-up, data integrity, and operational continuity.
- Produced SQL productivity reports, optimized queries, and automated recurring data extraction and tracking activities.
- Documented technical processes and collaborated with support teams to resolve issues in business-critical banking applications.

OITIC - Operaciones Inteligentes | Web Developer

May 2020 - May 2021 | Mexico | Remote

- Developed inventory systems and web portals for government institutions, including SEDESOL, SEGOB Puebla, and UPM.
- Built solutions with Java, React, and Bootstrap, from feature implementation through production maintenance.
- Administered CentOS servers and supported deployments, technical issues, and application stability.

SELECTED ENTERPRISE PROJECT PORTFOLIO

SPPI Enterprise Modernization: Java 8 to Java 21 migration, REST APIs with Spring Boot and Maven, Oracle/PLSQL, AWS, testing, certification, and deployments through IEECO.

InfoBionic U.S. Healthcare Platform: React, Node.js, PostgreSQL, REST APIs, and AWS; solution structuring, technical documentation, system diagrams, and cross-functional coordination.

DFC Alerts and R2R Monitoring: Java, Spring Boot, Angular, PostgreSQL, and RabbitMQ; 40% notification-efficiency improvement and monitoring workflows for Miami and Houston.

Delivery Application: React, JavaScript, Docker, and Google Cloud Platform for internal logistics, delivery, and operational workflows.

TECHNICAL LEADERSHIP AND DELIVERY

Solution design | Architecture discussions | Work planning and coordination | Technical approach definition | Collaboration with Product, Architecture, QA, and business teams | Documentation and system diagrams | Unit and integration testing | Production incident resolution

EDUCATION

Bachelor's Degree in Software Engineering
Universidad Politécnica de Tecámac (UPT) - Degree completed

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Microservices Developer - IT Academy (Silver Level)
- Google Cloud Certification
- Cambridge English Certification
- Microsoft Excel Certification
- Full Stack Development Foundations - Andocodeando

LANGUAGES

Spanish	Native
English	Advanced (B2-C1)

INDUSTRY EXPERIENCE AND STRENGTHS

Industries: financial services, retail, logistics, government, and healthcare. **Strengths:** cross-functional communication, structured problem solving, technical ownership, continuous learning, and delivery of scalable enterprise solutions.
